SPECIAL POINTS TO NOTE:

- **No bulls sell at Calgary or Medicine Hat** - *All of our best are in this sale!*
- All bulls are semen tested before sale
- **Credit of \$150** per bull to purchasers who take bulls from the sale.
- **Delivery:** Delivery to central points in Alberta at seller's convenience. Out of province purchases delivered by commercial hauler at shared cost.
- We strongly recommend that bulls be insured - an insurance agent will be available at the sale.
- **Flying In?** If flying into the Lethbridge Airport, call Balog Auction for pick-up: 1-403-320-1980.
- **Ultrasound Information** has been collected on most of these bulls as yearlings and will be available sale day or can be obtained prior to the sale by calling Peter at 403-625-1036. *Complete EPDs* (beyond those shown in this catalogue) are also available.

12TH ANNUAL BULL SALE

Peter Ulrich
Cell: 403-625-1036

Hans & Annette Ulrich
PH: 403-625-2237

We're really pleased to be able to present this functional set of 42 coming two-year-old bulls & 6 long yearlings for you this year!

It was a super challenging year in 2017 with near-drought-like conditions. We had so little rain this summer that the grass turned a sickly white and rummaging up enough pasture/hay/silage to keep everyone fed took the fun out of watching the youngsters grow!

Back in 2016, we changed our tattoo letters from the originally assigned "ALNK" to simply "U" for Ulrich! It's a lot less ink to work in at tattooing time, plus it makes web searches a breeze. For any of our sale animals simply search by tattoo U, space, then number & year letter. i.e. U 4D on the Animal Inquiries at hereford.ca.

While we didn't put as many bulls of the 2016 calf crop into the RFI test at Olds last year as we have in the past, we did send 20, and were pleased when 14 of them performed above average for Residual Feed Intake (feed efficiency) ...

The CHA has now moved to weekly EPD runs, so any differences between numbers referred to here at cataloguing time may differ slightly on the live results on the CHA website.

We'll keep this short as we are pleased to add 12 bred heifers to the sale and space is limited here in the catalogue! Once again, we are grateful for another year in the biz and look forward to seeing you all on sale day!

Sincerely,

Peter Ulrich and Hans & Annette Ulrich

Fellow Cattlemen,

Welcome to the Peter Ulrich 12th Annual Hereford Bull Sale!

Once again a powerful offering of high performance uniform bulls.

The Ulrich Herd is one of the leading performance & EPD herds in the breed.

Strong emphasis on maternal traits & ease of calving.

Great people who believe in the breed and their cattle.

Respectfully

R.C. (Bob) Balog

PLEASE NOTE

Pictures of the dams of many of the sale bulls, as well as updated sale information and a downloadable version of this catalogue is available at our website:

www.ulrichherefords.com

TERMS & CONDITIONS

TERMS - The terms of the sale are cash or cheque payable at Lethbridge, AB, on Sale Day. The right of property shall not pass until settlement is made. All settlements must be made with the clerks of the sale before any cattle will be released. For US export, USDA and individual state rules will apply.

BIDS - Every animal entering the sale ring will be sold to the highest bidder. A floor price will apply to each animal consigned.

DISPUTES - In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK - Each animal becomes the risk of the purchaser as soon as sold.

ANNOUNCEMENTS - Errors discovered in the catalogue will be corrected by announcements from the Auction Stand at sale time and such corrections will take precedence over the printed matter in the catalogue.

CERTIFICATE OF REGISTRY - A certificate of registry duly transferred will be furnished to the buyer for each animal after settlement is made.

SHIPPING - Assistance will be given in making shipment after the sale, but no risk is assumed by Balog Auction, or the seller. **Delivery to central points in Alberta will be made at seller's convenience.** Out-of-province purchases will be delivered by commercial hauler at shared cost. Any additional expenses are the responsibility of the buyer, including duty, brokerage fees, etc.

BREEDER'S GUARANTEE - The consignors have done everything possible to assure you, the buyer, that every bull in this sale will be a breeder. A certified veterinarian has semen tested and physically evaluated every bull. However, should a problem arise, please inform the seller so further arrangements may be made.

ACCIDENTS - Although every precaution will be taken to protect the safety and comfort of buyers, neither the sales manager, auctioneer nor any owner assumes any responsibility in this matter and disclaims any liability, legal or otherwise, in the event of accident or loss of property.

LIABILITY - Balog Auction is acting as agent only and assumes no responsibility for representations made by the seller. Purchasers must look to the seller for fulfillment of all guarantees and representations made hereunder.

SPECIAL POINTS to REMEMBER:

- No creep feed
- No hormones or medicated feed!
- Backgrounded, not pushed!

KEY TO PERFORMANCE TERMS USED HEREIN:

BW: Actual Birth Weight in Pounds
205: Weaning Weight in lbs adjusted to 205 Days
365: Yearling Weight in lbs adjusted to 365 days
RFI: Residual Feed Intake (feed efficiency)
PWG: Post Weaning Gain (difference between WN & YR)
LMY: Lean Meat Yield

Pictured on front cover: U 86D & 120D

21M ranks in the top % of the Hereford breed (see above) in many traits, including 2 in the top 1%!! He produces offspring with lots of vigor at birth & excellent performance that we & others are very proud of (like 8D, selling in this sale, who performed great in WW & YW and daughters like 45B, who produced 73D in this sale). In the recent Corbiell dispersal, the 21M progeny sold very well for both cows & bull calves. Lot 8D

What can he do? Produce thick meaty bulls with pants & wide tops and moderate-sized heifers, deep, sound & easy keeping with great udders. Why? 87W himself has a moderate birthweight, outstanding natural thickness, depth and length, good feet, quarters, & pants, performance, RibEye, Marbling and can pass it on! He multiplies the best attributes of his sire Jack Hammer 26R and his Old Domino 252M dam to produce beef-makers on both sides of a pedigree! Lots 41D, 55D, & 81D

Let's get the party started! Stout, deep, extra wide top, extremely thick, meaty and pants galore come from both Dad (203Y) and Mom (94Z). This son, with full pigment and red testicles, unlocks the potential to improve females' capacity and udder structure. 4D's Milk EPD is in the top 30% of the population, no doubt from dam 94Z's outstanding pedigree (see 2U, 114L & 152M sparkle there) and history of well-fleshing calves. Two of her bred daughters were purchased 2 years in a row by purebred breeder Greg Barber.

EPDs - Milk top 25%, Tot Mat top 30%, Scrotal Top 15%, PWG top 25%, Marbling Top 15% of the breed! Dam 2A brings the extra frame & length, with muscling & performance to her calves (3 sons avg BW 87 lbs, yet indexed 106.7 at WN) - they're born good & grow good. She weaned this 203Y's red-testicled calf at 761 lbs, (highest index), above avg YR (104 index), & above avg RFI (the EPDs concur)! The pairing of 2A & 203Y (Dino) is sure to produce great females with square udders & small teats, along with tender beef. **Recommended for heifers or cows.**

Heifer bull for easy unassisted birthdays - here's a 78 lb BW from dam 118A whose 3 bull calves avg'd 89lbs BW, yet weaned 107.3 indx! Looking for red? Dyke is a red boy with one goggle eye & 90% pigment in the other, red testicles, red neck, thick & meaty, red to the ground! He's designed to build cows/heifers by Pete 203Y who is making great young cows that last with great udders. Add some REA (112 indx), MARB (105 index) & Yield (65.4). Not convinced? 12D's EPDs: CE top 10%, BW top 5%, Milk top 15% MCE top 15%, MARB top 30% of the breed.

 AGA 53L MISS RED DOMINO 116R

Our BW & CE Trait Leader bull, Pete 203Y, has drummed up yet another great **heifer bull**, 64D, who is stout, wide-bodied, deep with red testicles and same pigmentation on both eyes. He was born to 56B, a deep, thick, feminine cow sired by the old AI bull, 60H (from an alphabet ago). She's an easy fleshing cow with a woolly haircoat which will do her well over many many winters with her expected longevity! 64D rattles out top 20% CE, top 15% BW & top MCE EPDs too!

Recommended for heifers, 65D darted out at birth a mere 65 lbs - sired by Pete 203Y, who specializes in these light calves that start growing once they hit the ground. 65D's now stout, short marked & curly with red neck & testicles - a very attractive bull. The excellent dam was a moderate size with a superb shapely udder, & wears a red woolly haircoat. Ultrasound pointed to a 123 index for MARB - see also top 5% Marb EPD, along with the expected top 1% CE, top 1% BW, top 20% Milk, & top 10% MCE. Don't let him dart out that door without your bid!

A grandson of Pete 203Y, this fella's got a lot to drum about! He's a **heifer bull** indeed, with his Pete 203Y top and quarters, and the red factor from sire 28Z - red eyes, red neck, red testicles, correct, sound, even some red in the hooves. 69D performed well at weaning & yearling. His dam, 93B, has a top udder and comes from a great family background. His rhythm is confirmed by top 5% of the breed for CE, top 10% for BW, and top 20% for MCE.

This Deckhand is ready to work - he's built for the job - really correct, thick, extra-long with a wide straight top - and bred for working by the deep and easy keeping 28Z. The dam, 57S, is an excellent cow with the volume, longevity and outstanding haircoat that we demand. While not particularly bred for the lightest birthweights, we certainly wouldn't hesitate to try him on a few heifers, (EPDs would tend to agree, as the CE EPD is in the top 30% of the breed and BW EPD in the top 20%), but he'd certainly be great maintenance for the cow herd.

If you're looking for a great heifer bull that can be used on cows too, Dan's your man! Sired by the BW Trait Leader Pete 203Y, 108D is stout, thick & sound. Born at only 81 lbs, he never looked back and has continued to perform well to this day. He's solid marked, with the coveted red neck and red testicles (note - Scrotal EPD is in the top 30% of the breed). The dam, 92B was marked solid, even exhibiting pigmentation in the feet, and is pleased to pass on maternal strength and tidy udders from many generations back!

"The Dominator" is deep and thick, with red testicles and partial pigmentation in both eyes, sired by the "Meat Machine" Rusty 372A. The dam, 1T, was a solid-marked, easy keeping cow, with a lot o' volume. She had a tight udder like her mother, 19R, and grandmother, 218N - great ancestors, excellent cows. When the counts come up, the Dominator finds himself with a Marb Index of 121, and lands in the top 15% of the breed for CE, top 30% for BW and top 20% for RFI EPD (& 121 index at the RFI Trial itself) - an efficiency pro!

What's not to like? 110D is a deep, wide-bodied, long son of 28Z with a very pleasant disposition. And you can't argue his red testicles and the 60/100 eye pigmentation... He was born to a beautiful, feminine, top-uddered daughter of the Corbiell bull, Micks Kaptain 82D. This heritage will pass on a level of dimension and scale to his progeny, so 110D will be a Dignified Sport indeed!

Stout, red, correct, this 24W son rolls out solid performance beneath a long curly haircoat. 13B is his very beautiful dam - extra deep, thick, easy-keeping, mossy, curly-coated with flat, well-placed quarters - special delivery from her dam, 40T. We sold a full flush brother of 13B to purebred breeder Matt Berry of Vita MT & he's working well for him. This younger protégé, 116D, scanned Marb 128 index & Yield 65.1. A top 15% of the breed for CE & top 10% for MARB EPD has this Depot looking for a new destination with either **heifers** or cows!

HERD HEALTH

CLARESHOLM VETERINARY SERVICES, LTD.

Box 2350, Claresholm AB T0L 0T0 (403) 625-3677

K. WRIGHT, DVM C. FANCY, DVM K. VANDERVALK, DVM K. MATTERS, DVM

January 2018

Claresholm Veterinary Services Ltd. has been providing veterinary service and consultation for over 30 years to the Ulrich Hereford Ranch. The majority of the service consists of breeding soundness evaluations of the bulls and herd health consultation.

Health problems are minimized with a good vaccination program and excellent management. Calves are vaccinated with the Zoetis SelectVac Gold Plus vaccine program (the comprehensive program to protect against respiratory disease

and BVD) in the spring and fall. The replacement heifers and bulls receive Bovi-Shield Gold FP5-VL5 in the spring before breeding. The cow herd receives Bovi-Shield Gold FP5-VL5 prior to calving. Cows and heifers also receive a scour prevention vaccine annually.

Claresholm Veterinary Services Ltd. is proud to be associated with the Ulrich Hereford Ranch and their cattle operation.

Thank You TO OUR SPONSORS!

ALL-STAR BREEDER

We at Ulrich Herefords are pleased to have been awarded the status of Five-Star Breeder, the highest possible, and 1 of only 37 operations across Canada to do so! This simply means that we have completely & accurately reported 5 traits: Calving Ease, Birthweights, Weaning Weights, Yearling Weights and Ultrasound on our entire calf crop.

86R - Dam of 85D

129X - Dam of 87D

WHAT IS AN EPD?

Expected Progeny Differences (EPDs) are genetic predictions producers can use when making selection decisions. These values are available on performance animals from breed associations. ***It is important to understand you cannot compare EPDs between breeds, only within a breed.*** A buyer is always advised to use more than just the EPDs regardless of accuracy when making purchase decisions.

An Expected Progeny Difference (EPD) is a measure of the genetic merit of an animal using relevant performance and pedigree information. EPDs are expressed in the units of measure. For example, birth weight is expressed in pounds, and rib-eye area is expressed in square inches.

EPDs come from performance data. Producers submit data on their cattle. From this data, researchers look at the differences between animals raised in the same environment (contemporary groups) and ascertain the portion of that difference that is due to genetics (heritability). Also included in this is how the different traits relate to each other and interact together (correlations). They can then directly compare genetic differences among animals using the pedigree information contained in the CHA and AHA registries. The result is a value that can be directly compared between animals and across environments, an EPD.

EPD'S USED IN THIS CATALOGUE

Calving Ease EPD (CE) - calculated using birth weight and calving ease score information. Calving ease EPDs represent the ease with which progeny of an animal are born to first calf heifers. The EPD is expressed as a percent probability, with a higher value representing calves with a higher probability of being born unassisted.

Birth Weight EPD (BW) - is an indicator of calving ease. Higher birth weight EPDs usually indicates more calving difficulty.

Weaning Weight EPD (WW) - reflects progeny growth differences up to 205-days.

Yearling Weight EPD (YW) - reflects progeny growth differences through to 365-days.

Milk EPD (Milk) - indicates the ability of a sire's daughters to provide their calves with an environment that encourages growth from birth to weaning, through mothering ability and milk production. This EPD is expressed in the expected difference in pounds of calf at weaning.

Total Maternal EPD (TM) - also known as Milk + Growth, this EPD combines the milk EPD plus 1/2 the Weaning Weight EPD. It is expressed in pounds of calf weaned at 205-Days and combines the genetics for pre-weaning growth and the influence of the maternal environment on the weaning weight of the daughter's progeny.

Maternal Calving Ease EPD (MCE) - represents the ease with which a sire's daughters will calve as first calf heifers, when compared to daughters of other sires. The EPD is expressed as a percent probability, with a higher value representing daughters with a higher probability of unassisted calving.

COMPARABILITY OF EPD'S

EPDs from Hereford animals are directly comparable to other Herefords in North America and parts of South America, due to the inclusion of data from Canada, United States, Uruguay & Argentina. As well, **it is important to remember that Hereford EPDs are NOT directly comparable to EPDs produced by different breeds, such as Angus or Simmental.**
