15TH ANNUAL BULL & HEIFER SALE

FEBRUARY 23

BALOG AUCTION

LETHBRIDGE, ALBERTA

SALE 1:00pm MST
JOIN US FOR LUNCH: 11:30 am

Welcome to the 15th Annual Ulrich Bull & Heifer Sale!

RAIN, finally, RAIN!! After 4 years of drought conditions, the wildly unpredictable year of 2020 provided some desperately needed moisture in the Spring. It was wonderful to see the grass grow again and to have hayfields to harvest! Although the summer really dried out again, and the grasshoppers somehow survived the rains to chomp again, it was invigorating to be able to supply our own feed this year rather than trucking it in or moving the cattle to feed. We took advantage of the growth this year to get lots of good silage - it's a great feeling to have that feed stashed away for future along with plenty of greenfeed. Things aren't quite back to normal, but lots, lots, lots better. All the money in the world cannot buy rain - or time!

We were able to sell & lease a good group of cows to relieve the grass situation and make room for the bulls to graze the homeplace this year. Performance has always been a top priority at Ulrich Hereford Ranch but it's most important to grow the bulls, not push them so they will keep on coming after the sale and continue to work for the buyers for years to come! We were pleased to be able to RFI test a lot of them in the winter and contribute to the ongoing emphasis of feed efficiency to benefit all... Many of our cattle have proven to excel in this area, including AGA 18Z ZOOM STAN CREDITOR 77C, who topped the GrowSafe Sire Summary last summer - see excerpt of his achievements on page 19 of this catalogue! 77C was sold to YV Ranch, but we retained semen interest so we have some grandsons available in this sale (sired by U 23E).

Mom & Dad have been staying close to home, grateful to be living on the ranch during these days of Covid-19. Mom has enjoyed being outdoors and having a happy garden last summer. Dad, at age 90, was particularly pleased to have Hereford America include an article on the Ulrich legacy in their October 2020 issue. It is nice to be acknowledged by the industry that you've poured your heart into for a lifetime!

So, once again, we anticipate seeing you, our invaluable customers again, and hope that you'll take advantage of the easy-to-use online services of DLMS, or phone in, if you are unable to attend Sale Day on Feb 23rd! Near or far, we deeply appreciate you all!

Sincerely,
Peter and Hans & Annette Ulrich

Welcome Cattlemen!

To the Peter Ulrich 15th Annual Bull Sale

A tremendous offering of top notch bulls from the herd that has always stressed performance as one of their top criteria!

In RFI feed efficiency tests, the Peter Ulrich herd produced the number 1 bull in Canada in all breeds and number 3 in the USA in the Hereford breed!

This strong set of bulls will work for the commercial and purebred herd, regardless of what colour cows you have!

Uniformity and ease of calving and tremendous performance numbers make the Ulrich Bulls an easy choice!

Take advantage and buy a Peter Ulrich Bull. See you at the sale.

Respectfully,

R.C. (Bob) Balog

TERMS & CONDITIONS

TERMS - The terms of the sale are cash or cheque payable at Lethbridge, AB, on Sale Day. The right of property shall not pass until settlement is made. All settlements must be made with the clerks of the sale before any cattle will be released. For US export, USDA and individual state rules will apply.

BIDS - Every animal entering the sale ring will be sold to the highest bidder. A floor price will apply to each animal consigned.

DISPUTES - In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK - Each animal becomes the risk of the purchaser as soon as sold.

ANNOUNCEMENTS - Errors discovered in the catalogue will be corrected by announcements from the Auction Stand at sale time and such corrections will take precedence over the printed matter in the catalogue.

CERTIFICATE OF REGISTRY - A certificate of registry duly transferred will be furnished to the buyer for each animal after settlement is made.

SHIPPING - Assistance will be given in making shipment after the sale, but no risk is assumed by Balog Auction, or the seller. Delivery to central points in Alberta will be made at seller's convenience. Out-of-province purchases will be delivered by commercial hauler at shared cost. Any additional expenses are the responsibility of the buyer, including duty, brokerage fees, etc.

BREEDER'S GUARANTEE - The consignors have done everything possible to assure you, the buyer, that every bull in this sale will be a breeder. A certified veterinarian has semen tested and physically evaluated every bull. However, should a problem arise, please inform the seller so further arrangements may be made.

ACCIDENTS - Although every precaution will be taken to protect the safety and comfort of buyers, neither the sales manager, auctioneer nor any owner assumes any responsibility in this matter and disclaims any liability, legal or otherwise, in the event of accident or loss of property.

LIABILITY - Balog Auction is acting as agent only and assumes no responsibility for representations made by the seller. Purchasers must look to the seller for fulfillment of all guarantees and representations made hereunder.

NO BULLS SELL AT CALGARY OR MEDICINE HAT
All of our best are in this sale!

ALL BULLS ARE SEMEN TESTED BEFORE SALE

CREDIT OF \$150 per bull to purchasers who take bulls from the sale

DELIVERY to central points in Alberta at seller's convenience. Out of province purchases delivered by commercial hauler at shared cost.

We strongly recommend that bulls be insured. Insurance agents will be available at the sale.

FLYING IN? If flying into Lethbridge Airport, call Balog Auction for pick up: 1(403)320-1980

ULTRASOUND INFORMATION has been collected on most of these bulls as yearlings and will be available sale day or can be obtained prior to the sale by calling Peter (403) 625-1036. Complete EPD's (beyond those shown in this catalog) are also available.

YV 77D had really good performance at both weaning and yearling, plus he did really well in RFI - a great fit for our herd which seems to excel in feed efficiency! He's a deep, thick, bull with a good haircoat... nice and wide up top! We're pleased with his progeny - they possess lots of substance, and a wide loin, along with really good topline. Many have a good haircoat, and a few have an extra lot of hair! The dam of 77D has been a long-standing icon at the YV Ranch, where feed efficiency has been important enough to install GrowSafe bunks. Lots 19G, 21G, 27G, 44G, 85G, 91G, 112G, 142G & Heifers 79G, 130G & 155G

This young herd sire must know he's a son of Creditor 77C, who topped our 2017 sale at \$17K to Nels & Terri Nixdorff, Airdrie AB. Creditor 77C has gone on to become the most feed-efficient sire of all breeds in GrowSafe's Summer 2020 Sire Summary (See excerpt on page 19). 23E has a broad hip, depth & sports 1 goggle eye & red testicles, but concentrates on performance (as a youngster, he ranked 4/65 for WN (724 lbs) & 1/53 for YR (1134 lbs), 3.60 lbs/WPDA). His dam has an excellent pedigree, whose sons all excelled at performance.

Lots 1G, 29G, 59G, 82G, 84G, 107G, 122G and Heifers 94G & 127G

ALL STAR BREEDER

We at Ulrich Herefords are pleased to have been awarded the status of Five-Star Breeder, the highest possible, and 1 of only 52 operations across Canada to do so! This simply means that we have completely & accurately reported 5 traits: Calving Ease, Birthweights, Weaning Weights, Yearling Weights and Ultrasound on our entire calf crop.

RFI - WHAT IS IT AND WHY SHOULD I CARE?

Residual Feed Intake is a measure of feed efficiency. One point in the scale represents 10 pounds of feed per year. A larger number on the scale indicates the animal is more efficient. It is important to balance this trait with gain, so the PWG EPD (Post Weaning Gain) identifies the difference between the WW & YW EPDs to keep growth in the analysis. Research has shown that identifying efficient animals translates into a huge savings for the cow/calf industry.

In the first two years of CHA Residual Feed Intake (RFI) testing, over 600 purebred Hereford bulls were monitored, with an Ulrich bull capturing the **top overall ranking!** (The majority of the Ulrich's other entries also ranked in the top half of those results.)

Ulrich Herefords #1 again!

According to GrowSafe's 2020 Summer Sire Summary, Creditor 77C produced the **most feed efficient calves of all breeds in Canada!**

He was also the 3rd most efficient high accuracy Hereford sire in North America in the GrowSafe database of 250,000 animals!

Claresholm Veterinary Services Ltd. has been providing veterinary service and consultation for over 40 years to the Ulrich Hereford Ranch. The majority of the service consists of breeding soundness evaluations of the bulls and herd health consultation.

Health problems are minimized with a complete vaccination program for cows, calves, bulls. Calves are vaccinated with the Zoetis Select Vac Gold Plus vaccine program (the comprehensive program to protect against respiratory disease and BVD) in the spring at pasture turn out and at weaning in the fall. The replacement heifers receive Bovi-Shield Gold FP5-VL5 in the spring before breeding. The cow herd receives Bovi-Shield Gold FP5-VL5 prior to calving. Cows and heifers also receive a scour prevention vaccine annually as well as a clostridial vaccine. The bulls receive Bovi-Shield FP5-VL5 in the spring as a yearling and are boosted with this again prior to the sale as a 2 year old.

Claresholm Veterinary Services Ltd. is proud to be associated with the Ulrich Hereford Ranch and their cattle operation.

WHAT IS AN EPD?

Expected Progeny Differences (EPDs) are genetic predictions producers can use when making selection decisions. These values are available on performance animals from breed associations. It is important to understand you cannot compare EPDs between breeds, only within a breed. A buyer is always advised to use more than just the EPDs regardless of accuracy when making purchase decisions.

An Expected Progeny Difference (EPD) is a measure of the genetic merit of an animal using relevant performance and pedigree information. EPDs are expressed in the units of measure. For example, birth weight is expressed in pounds, and rib-eye area is expressed in square inches.

EPDs come from performance data. Producers submit data on their cattle. From this data, researchers look at the differences between animals raised in the same environment (contemporary groups) and ascertain the portion of that difference that is due to genetics (heritability). Also included in this is how the different traits relate to each other and interact together (correlations). They can then directly compare genetic differences among animals using the pedigree information contained in the CHA and AHA registries. The result is a value that can be directly compared between animals and across environments, an EPD.

EPD'S USED IN THIS CATALOGUE

Calving Ease EPD (CE) - calculated using birth weight and calving ease score information. Calving ease EPDs represent the ease with which progeny of an animal are born to first calf heifers. The EPD is expressed as a percent probability, with a higher value representing calves with a higher probability of being born unassisted.

Birth Weight EPD (BW) - is an indicator of calving ease. Higher birth weight EPDs usually indicates more calving difficulty.

Weaning Weight EPD (WW) - reflects progeny growth differences up to 205-days.

Yearling Weight EPD (YW) - reflects progeny growth differences through to 365-days.

Milk EPD (Milk) - indicates the ability of a sire's daughters to provide their calves with an environment that encourages growth from birth to weaning, through mothering ability and milk production. This EPD is expressed in the expected difference in pounds of calf at weaning.

Total Maternal EPD (TM) - also known as Milk + Growth, this EPD combines the milk EPD plus 1/2 the Weaning Weight EPD. It is expressed in pounds of calf weaned at 205-Days and combines the genetics for pre-weaning growth and the influence of the maternal environment on the weaning weight of the daughter's progeny.

Maternal Calving Ease EPD (MCE) - represents the ease with which a sire's daughters will calve as first calf heifers, when compared to daughters of other sires. The EPD is expressed as a percent probability, with a higher value representing daughters with a higher probability of unassisted calving.

COMPARABILITY OF EPD'S

EPDs from Hereford animals are directly comparable to other Herefords in North America, due to the inclusion of data from Canada and the United States. As well, it is important to remember that Hereford EPDs are NOT directly comparable to EPDs produced by different breeds, such as Angus or Simmental.

All EPD's were quoted at time of writing, and weekly runs may have altered these numbers over time.
