SALE 1:00pm MST
JOIN US FOR LUNCH: 11:30 am

A good dose of optimism is essential for raising cattle in southern Alberta! 2021 proved to be another really challenging year for moisture and feed supplies. With the drought so wide-spread across Western Canada and the States, it was even more difficult to find & fund feed sources for the 2021-2022 winter... This proves we aren't in the cattle business because it's easy, but we are committed to the Hereford genetics for many reasons. One of which is the feed efficiency of the Hereford breed, and more specifically the high-level feed efficiency represented by our cattle. We have been faithfully testing RFI (Residual Feed Intake) values through GrowSafe feed bunks since the CHA began testing in 2012. We're really pleased to see plenty of feed efficiency in our herd when compared to all other breeds in GrowSafe's database (now over 270,000 head)! See page 26 for more details! And note: Of the 12 reference sires listed, 9 of them rank in the top 14% of the breed or higher (5 of these top 1%!).

We're also really pleased to see the success of the Fall Sales last year. The optimism of the industry as a whole helps keep us going! We've got an offering of both coming 2-year-olds and some long yearling bulls, as well as a nice bunch of bred heifers in this year's sale. We're confident that the cattle industry will survive and thrive with purebred genetics like those offered here. The bulls are grown out, not pushed, so they are fit to keep working for years to come. The heifers, we are confident, will make a great addition to any herd... 50% of any animal comes from the dam, and we take pride in our emphasis on "remarkable" cows, striving for less maintenance based on solid structural soundness, conformation, udders and good feet, while still requiring them to perform with calf pounds of gain!

This catalogue displays many of the TOP percentiles of EPDs on these sale animals. "Top % of the Breed" figures denote the TOP 30% or greater from the whole Hereford population in Canada as calculated by the CHA... The smaller the number, the higher ranked they are! Due to space constraints we were not able to publish all the details on these EPDs individually but they can be found on the CHA's website www.hereford.ca. You'll see that 26 of the 71 head offered in this sale rank in the top 30% RFI (feed efficiency) across the breed! Of that bunch, 11 are in the top 1% or 2%, and 14 head are in the top 4%!! This brings us right back to the bottom line - profitability!

Once again, we're thankful that Mom & Dad are still on the ranch and have been able to avoid Covid thus far. It's nice to have them close-by and enjoying the freedom of the great outdoors and the comforts of home. Hope to see you in-person at the sale on Feb 22nd, but don't forget you can always log-in through DLMS to participate online... We also plan to put many videos on YouTube again this year...

Thank you all for your support!

Sincerely,
Peter and Hans & Annette Ulrich

FELLOW CATTLEMEN:

Welcome to the Peter Ulrich 16th Annual Bull Sale! In this sale you will find a fantastic offering of approx. 45 Bulls & Bred Heifers.

The Ulrich herd is well known to be a foundation leader of performance and pedigree in the Nation! When performance testing started and EPD's became an important selection factor, the Ulrich herd was a leader. Now with RFI testing becoming more important every year, once again the Ulrich program is the leader!

Ulrich's have been #1 in Canada in all breeds, #3 in the USA in the Hereford breed. This year Ulrich's have 4 sires leading in the top 1% of all the breeds. The other important criteria that Peter gives to the industry is the strength in proven pedigree results.

Once again in this offering are old proven pedigrees and the newest power house pedigrees. Uniformity and Ease of Calving along with tremendous proven performance make the Ulrich Bulls an Easy Choice!

See you at the sale!

Respectfully,

R.C. (Bob) Balog

Instructions for Viewing And Bidding At the Sale

Visit www.dlms.ca, Fill out the registration form located under registration and sign-up for your free user account to select a username and password.

BIDDERS - To be approved as a bidder, Log in and click BUYER APPROVAL tab, select the sale you are interested in bidding at and click sign up.

For more information or for help getting approved Call:
Whitney Bosovich 780.991-3025 or Mark Shologan - 780-699-5082

TERMS & CONDITIONS

TERMS - The terms of the sale are cash or cheque payable at Lethbridge, AB, on Sale Day. The right of property shall not pass until settlement is made. All settlements must be made with the clerks of the sale before any cattle will be released. For US export, USDA and individual state rules will apply.

BIDS - Every animal entering the sale ring will be sold to the highest bidder. A floor price will apply to each animal consigned.

DISPUTES - In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK - Each animal becomes the risk of the purchaser as soon as sold.

ANNOUNCEMENTS - Errors discovered in the catalogue will be corrected by announcements from the Auction Stand at sale time and such corrections will take precedence over the printed matter in the catalogue.

CERTIFICATE OF REGISTRY - A certificate of registry duly transferred will be furnished to the buyer for each animal after settlement is made.

SHIPPING - Assistance will be given in making shipment after the sale, but no risk is assumed by Balog Auction, or the seller. Delivery to central points in Alberta will be made at seller's convenience. Out-of-province purchases will be delivered by commercial hauler at shared cost. Any additional expenses are the responsibility of the buyer, including duty, brokerage fees, etc.

BREEDER'S GUARANTEE - The consignors have done everything possible to assure you, the buyer, that every bull in this sale will be a breeder. A certified veterinarian has semen tested and physically evaluated every bull. However, should a problem arise, please inform the seller so further arrangements may be made.

ACCIDENTS - Although every precaution will be taken to protect the safety and comfort of buyers, neither the sales manager, auctioneer nor any owner assumes any responsibility in this matter and disclaims any liability, legal or otherwise, in the event of accident or loss of property.

LIABILITY - Balog Auction is acting as agent only and assumes no responsibility for representations made by the seller. Purchasers must look to the seller for fulfillment of all guarantees and representations made hereunder.

NO BULLS SELL AT CALGARY OR MEDICINE HAT
All of our best are in this sale!

ALL BULLS ARE SEMEN TESTED BEFORE SALE

CREDIT OF \$150 per bull to purchasers who take bulls from the sale

DELIVERY to central points in Alberta at seller's convenience. Out of province purchases delivered by commercial hauler at shared cost.

We strongly recommend that bulls be insured. Insurance agents will be available at the sale.

FLYING IN? If flying into Lethbridge Airport, call Balog Auction for pick up: 1(403)320-1980

ULTRASOUND INFORMATION has been collected on most of these bulls as yearlings and will be available sale day or can be obtained prior to the sale by calling Peter (403) 625-1036. Complete EPD's (beyond those shown in this catalog) are also available.

Top % of Breed: MCE 9%, RFI 17% • Jim Hole was known as one of the all-time premier breeders in Canada, & once said that "43K" was the best bull he ever raised! Some had also claimed he was the best & most complete bull they had ever seen. 43K was smooth, thick, extremely heavy-boned with an outstanding yellow haircoat, & moved as freely as any bull could move. Daughters are feminine & growthy; sons keep on growing. These attributes are just as important today. It's bulls like 43K that have made the breed what it is today! He even ranks top 5% feed efficiency of all breeds in GrowSafe.

Goggle-eyed, & red to the toes with pigmented feet, this was a stout son of 705!
Extra thick in his butt and over the top, he was an impressive bull. He held his head up, bright & alert but was calm as a house kitten. Great doing ability was evident, and great carcass numbers concurred (3rd in Ribeye, and 128 index Marb)! The dam brought 21M light birthweight genetics and provided rich, rich milk from a great udder. 67X was also co-owned with Bert Anderson. 67X ranks top 4% in feed efficiency of all breeds in GrowSafe's database (over 270,000 head)

We are really pleased how many of KGA 48A's offspring have arrived - bull calves have averaged 78 lbs BW and heifer calves have averaged 70 lbs at birth) and not just light birthweights, but nice performance too - check out 12H! Shared with Doerksen's at Gem, AB - 48A was smooth & correct - promising to deliver calving ease plus performance and we received all those results! Plus his daughters are turning out well too, with nice moderate-sized udders & teats. 48A ranks top 14% in feed efficiency of all breeds in GrowSafe (270,000 head).

Lots 12H and Heifer 63H

Westgards (Windimuir) raised this fine bull, and we were fortunate enough to acquire him through their dispersal sale. We were impressed with his Westgard progeny (calves show excellent growth, thickness & volume), his attractive conformation and excellent feet and legs. He comes from a great producing cow family. We were pleased to use his 67G son in our own herd to extend those attributes and genetics, letting him run with 31 head. He handled that well, and here's your chance to acquire these genetics for your own herd!

AGA 113F STANMORE 13H

SNS 67F SILVER SKY LADY 107H

Top % of Breed: RFI 22%

YV 77D had really good performance at both weaning and yearling, plus he did really well in RFI - a great fit for our herd which seems to excel in feed efficiency! He's a deep, thick, bull with a good haircoat... nice and wide up top! His progeny possess lots of substance, a wide loin, with really good toplines and good haircoats. The dam of 77D has been a long-standing icon at the YV Ranch, where they value feed efficiency enough to install GrowSafe bunks for measurement. GrowSafe ranks 77D in the top 16% in feed efficiency of all breeds (270,000 head).

Lots 21H & Heifer 24H

Top % of the Breed: MCE 28%

A favorite from Jim Hole's herd was 43K, who left tight-uddered, easy-keeping cows with longevity & excellent feet. Other 47E elements: thick, deep, quiet, with a golden curly haircoat, red testicles, mostly red eyes, small feather neck & full of performance (WW 113 idx, past summer 3.54 ADG = 1853 lbs by Dec 2018) while easy on feed! The sire's age punishes EPDs, but indexes excel: 106 REA (1.01/100 lbs), 115 Ribfat, 122 Rump. Volumous, red dam 118A had a flat udder & well-placed teats. 47E ranks top 6% in feed efficiency of all breeds in GrowSafe.

January, 2022

Claresholm Veterinary Services Ltd. has been providing veterinary service and consultation for over 40 years to the Ulrich Hereford Ranch. The majority of the service consists of breeding soundness evaluations of the bulls and herd health consultation.

Health problems are minimized with a complete vaccination program for cows, calves, and bulls. Calves are vaccinated with the Zoetis SelectVac Gold Plus vaccine program (the comprehensive program to protect against respiratory disease and BVD) in the spring at pasture turn out and at weaning in the fall. The replacement heifers receive Bovi-Shield Gold FP5-VL5 in the spring before breeding. The cow herd receives Bovi-Shield Gold FP5-VL5 prior to calving. Cows and heifers also receive a scour prevention vaccine annually as well as a clostridial vaccine. The bulls receive Bovi-Shield Gold FP5-VL5 in the spring as a yearling and are boosted with this again prior to the sale as a 2 year old.

The bred heifers in the sale were preg checked on December 17, 2021. They are pregnant to calve in April and May of 2022.

Claresholm Veterinary Services Ltd. is proud to be associated with the Ulrich Hereford Ranch and their cattle operation.

ALL STAR BREEDER

We at Ulrich Hereford Ranch are pleased to have been awarded the status of 7-Star Breeder (highest possible), and 1 of only 18 operations across Canada to do so! This simply means that we have completely & accurately reported 7 traits : Calving Ease, Birthweights, Weaning Weights, Yearling Weights, Cow Weights, Ultrasound, Udder & Teat scores on our entire calf crop.

RFI - WHAT IS IT AND WHY SHOULD I CARE?

Residual Feed Intake is a measure of feed efficiency. One point in the scale represents 10 pounds of feed per year. A larger number on the scale indicates the animal is more efficient. It is important to balance this trait with gain, so the PWG EPD (Post Weaning Gain) identifies the difference between the WW & YW EPDs to keep growth in the analysis. Research has shown that identifying efficient animals translates into a huge savings for the cow/calf industry.

Ulrich Herefords' Feed Efficiency!

In the first two years of CHA Residual Feed Intake (RFI) testing, over 600 purebred Hereford bulls were monitored, with an Ulrich bull capturing the **top overall ranking!** (The majority of the Ulrich's other entries also ranked in the top half of those results.)

Ulrich Herefords have **4 sires** in the **top 1%** of the whole GrowSafe (Vytelle) database, and **10 sires** in the **top 20%** of the database worldwide (over 270,000 animals)! AGA 77J SUPERMAN 48Y is currently the **3rd most efficient**, and AGA 18Z ZOOM STAN CREDITOR 77C (pictured) is the **4th most efficient** of all the Canadian Hereford high accuracy sires.

WHAT IS AN EPD?

Expected Progeny Differences (EPDs) are genetic predictions producers can use when making selection decisions. These values are available on performance animals from breed associations. It is important to understand you cannot compare EPDs between breeds, only within a breed. A buyer is always advised to use more than just the EPDs regardless of accuracy when making purchase decisions.

An Expected Progeny Difference (EPD) is a measure of the genetic merit of an animal using relevant performance and pedigree information. EPDs are expressed in the units of measure. For example, birth weight is expressed in pounds, and rib-eye area is expressed in square inches.

EPDs come from performance data. Producers submit data on their cattle. From this data, researchers look at the differences between animals raised in the same environment (contemporary groups) and ascertain the portion of that difference that is due to genetics (heritability). Also included in this is how the different traits relate to each other and interact together (correlations). They can then directly compare genetic differences among animals using the pedigree information contained in the CHA and AHA registries. The result is a value that can be directly compared between animals and across environments, an EPD.

EPD'S USED IN THIS CATALOGUE

Calving Ease EPD (CE) - calculated using birth weight and calving ease score information. Calving ease EPDs represent the ease with which progeny of an animal are born to first calf heifers. The EPD is expressed as a percent probability, with a higher value representing calves with a higher probability of being born unassisted.

Birth Weight EPD (BW) - is an indicator of calving ease. Higher birth weight EPDs usually indicates more calving difficulty.

Weaning Weight EPD (WW) - reflects progeny growth differences up to 205-days.

Yearling Weight EPD (YW) - reflects progeny growth differences through to 365-days.

Milk EPD (Milk) - indicates the ability of a sire's daughters to provide their calves with an environment that encourages growth from birth to weaning, through mothering ability and milk production. This EPD is expressed in the expected difference in pounds of calf at weaning.

Total Maternal EPD (TM) - also known as Milk + Growth, this EPD combines the milk EPD plus 1/2 the Weaning Weight EPD. It is expressed in pounds of calf weaned at 205-Days and combines the genetics for pre-weaning growth and the influence of the maternal environment on the weaning weight of the daughter's progeny.

Maternal Calving Ease EPD (MCE) - represents the ease with which a sire's daughters will calve as first calf heifers, when compared to daughters of other sires. The EPD is expressed as a percent probability, with a higher value representing daughters with a higher probability of unassisted calving.

COMPARABILITY OF EPD'S

EPDs from Hereford animals are directly comparable to other Herefords in North America, due to the inclusion of data from Canada and the United States. As well, it is important to remember that Hereford EPDs are NOT directly comparable to EPDs produced by different breeds, such as Angus or Simmental.

All EPD's were quoted at time of writing, and weekly runs may have altered these numbers over time.
