ULRICH HEREFORDS DISPERSAL SALE

DECEMBER 13 | BALOG AUCTION

LETHBRIDGE, ALBERTA

SALE 1:00pm MST
JOIN US FOR LUNCH: 11:30 am

The time has come. All the cows must go!

It is with mixed feelings that we close this chapter of the Ulrich Hereford legacy. It all started with Dad back in 1968 and has continued through to these closing sales, this one in December 2022 and the last one on February 21, 2023.

We have always prided ourselves on our dedication to the Hereford breed - its contribution to the cattle industry in Canada, its promotion as premier breeding stock, and its performance and pride in producing good, good cattle. The Herefords have been good to us, but after several years of drought, the difficulties of finding good help, and new health challenges, an offer on the land came along with the right price and the right timing. That has provided this incredible opportunity for you to purchase our esteemed cows and carry on the wonderful Hereford traditions with your own families.

The Spring of 2022 looked hopeful. A few rains provided enough growth for some silage and a few more hay bales than the year before. The year dried out in mid-July and the grasshoppers returned again to compete with the cattle for every blade of grass. It was a beautiful long Fall in southern Alberta, which Winter so rudely interrupted in early November! Unfortunately, we didn't have an opportunity to RFI test our yearlings this year, and were really disappointed. We have been a strong advocate of the CHA's RFI (feed efficiency) program and have had great success with our genetics proving themselves against not only the rest of the breed but the entire GrowSafe database. See page 50. We would like to see the feed efficiency program continue to thrive.

The dispersal has been split into two sales to spread out the workload and provide more opportunities for the buyers. The bred cows and some bred heifers along with a small number of bulls sell in December. The Fall cows will be selling in the Spring along with the bulk of the bulls and the rest of the bred heifers.

Mom & Dad have both escaped Covid to date. However the isolation of staying at home has really hit Dad hard, without the chance to visit with friends and family which he always enjoyed so much. We're all getting older, and I'm looking forward to having more time to look after my health and slow down some also.

I have immense gratitude toward both my parents for the opportunity, the knowledge, and the support they have provided to me for all these years. Without them, I wouldn't be where I am today. I am pleased to have carried on their legacy all these years - and have also been a member of the Canadian Hereford Association for over 50 years myself!

So, as the beginning of the end brings us together on December 13th, I, too, look forward to seeing you all in Lethbridge. Thanks so much for your support!

Sincerely,
Peter Ulrich
Hans & Annette Ulrich

It is with great privilege, that I share a few words with you, the cattle industry on the Ulrich Hereford Dispersal!

The most respectful way to start is to address the people. Both Hans and Peter, two of the finest gentlemen you could ever hope to deal with! Always willing to work with breeders young and old, purebred and commercial, to ensure that the cattle they sold you would work to the limit, and when we start to talk about the program there are not enough pages!

The herd that started performance testing!

The herd that has excelled throughout the nation in the Grow Safe Program!

The herd that has sent genetics and cattle throughout the world and the herd that has produced most herd sires for more breeders than any I have ever worked with.

If you truly believe in the breed, then this dispersal gives you the opportunity to buy from the base that started it all.

This opportunity only presents itself a few times!
Respectfully,

R.C. (Bob) Balog

Instructions for Viewing And Bidding At the Sale

Visit www.dlms.ca, Fill out the registration form located under registration and sign-up for your free user account to select a username and password.

BIDDERS - To be approved as a bidder, Log in and click BUYER APPROVAL tab, select the sale you are interested in bidding at and click sign up.

For more information or for help getting approved Call:
Whitney Bosovich 780.991-3025 or Mark Shologan - 780-699-5082

TERMS & CONDITIONS

TERMS - The terms of the sale are cash or cheque payable at Lethbridge, AB, on Sale Day. The right of property shall not pass until settlement is made. All settlements must be made with the clerks of the sale before any cattle will be released. For US export, USDA and individual state rules will apply.

BIDS - Every animal entering the sale ring will be sold to the highest bidder. A floor price will apply to each animal consigned.

DISPUTES - In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK - Each animal becomes the risk of the purchaser as soon as sold.

ANNOUNCEMENTS - Errors discovered in the catalogue will be corrected by announcements from the Auction Stand at sale time and such corrections will take precedence over the printed matter in the catalogue.

CERTIFICATE OF REGISTRY - A certificate of registry duly transferred will be furnished to the buyer for each animal after settlement is made.

SHIPPING - Assistance will be given in making shipment after the sale, but no risk is assumed by Balog Auction, or the seller. Delivery to central points in Alberta will be made at seller's convenience. Out-of-province purchases will be delivered by commercial hauler at shared cost. Any additional expenses are the responsibility of the buyer, including duty, brokerage fees, etc.

BREEDER'S GUARANTEE - The consignors have done everything possible to assure you, the buyer, that every bull in this sale will be a breeder. A certified veterinarian has semen tested and physically evaluated every bull. However, should a problem arise, please inform the seller so further arrangements may be made.

ACCIDENTS - Although every precaution will be taken to protect the safety and comfort of buyers, neither the sales manager, auctioneer nor any owner assumes any responsibility in this matter and disclaims any liability, legal or otherwise, in the event of accident or loss of property.

LIABILITY - Balog Auction is acting as agent only and assumes no responsibility for representations made by the seller. Purchasers must look to the seller for fulfillment of all guarantees and representations made hereunder.

NO BULLS SELL AT CALGARY OR MEDICINE HAT
All of our best are in this sale!

ALL BULLS OF BREEDING AGE ARE SEMEN TESTED BEFORE THE SALE

CREDIT OF \$150 per animal to purchasers who take animals from the sale

DELIVERY to central points in Alberta at seller's convenience. Out of province purchases delivered by commercial hauler at shared cost.

We strongly recommend that all animals be insured. Insurance agents will be available at the sale.

FLYING IN? If flying into Lethbridge Airport, call Balog Auction for pick up: 1(403)320-1980

ULTRASOUND INFORMATION has been collected on most of these bulls as yearlings and will be available sale day or can be obtained prior to the sale by calling Peter (403) 625-1036. Complete EPD's (beyond those shown in this catalog) are also available.

Jim Hole was known as one of the all-time premier breeders in Canada, & once said that "43K" was the best bull he ever raised! Some had also claimed he was the best & most complete bull they had ever seen. 43K was smooth, thick, extremely heavy-boned with an outstanding yellow haircoat, & moved as freely as any bull could move. Daughters are feminine & growthy; sons keep on growing. These attributes are just as important today. It's bulls like 43K that have made the breed what it is today!

This light-coloured, good-haired bull with the Canadian pedigree was long & thick with sound feet. He pasture-bred until he was 12 years old! These were all good reasons for Misty Valley Farms to collect this bull. We bought some semen and were really pleased with the excellent females he left in our herd, improving udders superbly. His sons were easy to sell also.

22B has long been leaving well-put-together females with good hair and excellent udders. These females are infused with stayability and have been highly regarded by both commercial and purebred cattlemen alike! Not only have the females excelled like our special 511E, but 22B has injected our operation with fine sons such as 97J, an outstanding light birthweight sire and 53L who was Grand Champion at the Medicine Hat Bull Sale in 2003.

24H is a legendary bull used both in the States and in Australia. He's an old-timer that has returned to add muscle and carcass to the modern pedigree. I'd been looking for some semen from this bull for some time and was pleased to have found some just a year ago! I'm excited to see how this bull works on my cowherd.

77J was a big, stout muscled bull with good feet and females that have lots of volume, are easy keeping and easy doing. We've used this bull with great success in the past. Others are also very fond of these genetics. 03H, which I used this past summer, has a Superman maternal side and he reminds me of the typical Superman style of easy-keeping cattle!

We purchased Jarrod 26T from Coulee Crest after looking for a SUPERMAN 77J son with a moderate birthweight and high performance. The mother needed to have excellent feet & udder, as well as be feminine & attractive. 26T left moderate birthweights, plus performance with good pigmentation which meant this bull fit right into our program! 77J's size, stoutness, easy keeping, easy doing with good udders, mass & muscling, and strong carcass traits passed down to his progeny and grandprogeny.

This 2008 weaning/yearling performance leader also delivered Calving Ease, thanks to his sire 46E – a “one of a kind” bull who produced light birthweights, great performance & awesome cows 50 yrs ago. Now bulls like 46E are being rejuvenated & progeny have created better cattle! 2U's dam, 511E, was a step ahead in bringing finer offspring to the breed. Impressive 2U builds wide topped, thick, deep, & long progeny.

Goggle-eyed, & red to the toes with pigmented feet, this was a stout son of 705! Extra thick in his butt and over the top, he was an impressive bull. He held his head up, bright & alert but was calm as a house kitten. Great doing ability was evident, and great carcass numbers concurred (3rd in Ribeye, and 128 index Marb)! The dam brought 21M light birthweight genetics and provided rich, rich milk from a great udder. 67X was also co-owned with Bert Anderson. 67X ranks top 4% in feed efficiency of all breeds in GrowSafe's database (over 270,000 head).

Milk:	21.3	32E was fabulous. Credited at birth with 86 lbs, goggle eyes, & investments by sire 18Z, 32E was deep with plenty of length, a big hip, & marked solid with a thick mossy haircoat & big hanging red testicles to ultimately breed more cows. Performance – he shone at the RFI Test (eating less, gaining well!) with 111 RFI EPD, then grew into 1887 lbs by Dec 2018 (ADG 3.51). His proud dam, 129X, is an elite cow – some offspring going purebred to: MN & Eureka, Ayrey Herefords, DW Herefords (Frasers) and Beery Land & Livestock, MT.

I was impressed with the mother of 77G last summer at SNS – deep, thick with a nice udder. 77G himself had a good birthweight and lots of performance plus was well-marked, long and correct. He sold to Philip Moon from Arkansas at the Calgary Bull Sale 2021. SNS kept a semen interest and I purchased a semen interest and now have some whopping offspring... We have many cows in this sale bred to Explosive Lad 77G.

Here's a Hole-In-One to shoot for in this dispersal sale! We bred many heifers to this bull this past summer. He was a really nice stylish youngster with good conformation and a nice birthweight (84 lbs) and a weaning index of 119! His dam was a delightful first-calf heifer from a beautiful cow line - a solid background. I had used 12H for two years on heifers and now he's sold to Harvey Goetz from Bluffton, AB.

Born in 1976, 60H was the maternal grandsire of the great STANDRD LAD 656 4ET. He was thick, deep, and easy-keeping with a pedigree that many people admired, including us. Jim Hines of Marwayne, AB, offered us some doses of this bull, and we happily accepted. We used this semen with great success.

Here are historically great genetics brought back because of the exciting pedigree & calves that 13X has produced through the years. His reputation in Fowlie's herd, along with his use across many prominent purebred herds, stands on its own merit! We now have some semen to infuse this performance of times past with the modern cow. Unfortunately, the EPD system seems biased against old bulls but results are more than just numbers.

CLARESHOLM VETERINARY SERVICES, LTD.

235 STARLINE ROAD, BOX 2350 CLARESHOLM ALBERTA T0L 0T0

403-625-3677

November 9, 2022

To Whom it May Concern,

Claresholm Veterinary Services Ltd. has been providing veterinary services and consultation for over 40 years to the Ulrich Hereford Ranch. The majority of the service consists of breeding soundness evaluations of the bulls, pregnancy testing and herd health consultations. Health problems are minimized with a complete vaccination program for cows, calves and bulls.

Calves are vaccinated with the Zoetis SelectVac Gold Plus vaccine program (the comprehensive program to protect against respiratory disease and BVD) in the spring at pasture turn out and at weaning in the fall.

The replacement heifers receive Bovi-Shield Gold FP5-VL5 in the spring before breeding. The cow herd receives Bovi-Shield Gold FP5-VL5 prior to calving. Cows and heifers also receive a scour prevention vaccine annually as well as a clostridial vaccine.

The bulls receive Bovi-Shield Gold FP5-VL5 in the spring as a yearling and are boosted with this again prior to the sale as a 2 year old.

The females in the sale were preg tested in mid October to be pregnant. Peter has a copy of their suspected calving dates from the preg test. Claresholm Veterinary Services Ltd. is proud to be associated with the Ulrich Hereford Ranch and their cattle operation!

Sincerely,
Dr Kelsey Vandervalk

ALL STAR BREEDER

We at Ulrich Hereford Ranch are pleased to have been awarded the status of 5-Star Breeder. This simply means that we have completely & accurately reported 5 traits: Calving Ease, Birthweights, Weaning Weights, Yearling Weights, Udder & Teat scores on our entire calf crop.

RFI - WHAT IS IT AND WHY SHOULD I CARE?

Residual Feed Intake is a measure of feed efficiency. One point in the scale represents 10 pounds of feed per year. A larger number on the scale indicates the animal is more efficient. It is important to balance this trait with gain, so the PWG EPD (Post Weaning Gain) identifies the difference between the WW & YW EPDs to keep growth in the analysis. Research has shown that identifying efficient animals translates into a huge savings for the cow/calf industry.

Ulrich Herefords' Feed Efficiency!

In the first two years of CHA Residual Feed Intake (RFI) testing, over 600 purebred Hereford bulls were monitored, with an Ulrich bull capturing the **top overall ranking!** (The majority of the Ulrich's other entries also ranked in the top half of those results.)

Ulrich Herefords produced **5 sires** in the **top 1%** of the whole GrowSafe (Vytelle) database, and **13 sires** in the **top 10%** (well over **270,000** animals worldwide).

WHAT IS AN EPD?

Expected Progeny Differences (EPDs) are genetic predictions producers can use when making selection decisions. These values are available on performance animals from breed associations. It is important to understand you cannot compare EPDs between breeds, only within a breed. A buyer is always advised to use more than just the EPDs regardless of accuracy when making purchase decisions.

An Expected Progeny Difference (EPD) is a measure of the genetic merit of an animal using relevant performance and pedigree information. EPDs are expressed in the units of measure. For example, birth weight is expressed in pounds, and rib-eye area is expressed in square inches.

EPDs come from performance data. Producers submit data on their cattle. From this data, researchers look at the differences between animals raised in the same environment (contemporary groups) and ascertain the portion of that difference that is due to genetics (heritability). Also included in this is how the different traits relate to each other and interact together (correlations). They can then directly compare genetic differences among animals using the pedigree information contained in the CHA and AHA registries. The result is a value that can be directly compared between animals and across environments, an EPD.

EPD'S USED IN THIS CATALOGUE

Calving Ease EPD (CE) - calculated using birth weight and calving ease score information. Calving ease EPDs represent the ease with which progeny of an animal are born to first calf heifers. The EPD is expressed as a percent probability, with a higher value representing calves with a higher probability of being born unassisted.

Birth Weight EPD (BW) - is an indicator of calving ease. Higher birth weight EPDs usually indicates more calving difficulty.

Weaning Weight EPD (WW) - reflects progeny growth differences up to 205-days.

Yearling Weight EPD (YW) - reflects progeny growth differences through to 365-days.

Milk EPD (Milk) - indicates the ability of a sire's daughters to provide their calves with an environment that encourages growth from birth to weaning, through mothering ability and milk production. This EPD is expressed in the expected difference in pounds of calf at weaning.

Total Maternal EPD (TM) - also known as Milk + Growth, this EPD combines the milk EPD plus 1/2 the Weaning Weight EPD. It is expressed in pounds of calf weaned at 205-Days and combines the genetics for pre-weaning growth and the influence of the maternal environment on the weaning weight of the daughter's progeny.

Maternal Calving Ease EPD (MCE) - represents the ease with which a sire's daughters will calve as first calf heifers, when compared to daughters of other sires. The EPD is expressed as a percent probability, with a higher value representing daughters with a higher probability of unassisted calving.

COMPARABILITY OF EPD'S

EPDs from Hereford animals are directly comparable to other Herefords in North America, due to the inclusion of data from Canada and the United States. As well, it is important to remember that Hereford EPDs are NOT directly comparable to EPDs produced by different breeds, such as Angus or Simmental.

All EPD's were quoted at time of writing, and weekly runs may have altered these numbers over time.
