SALE 1:00pm MST

ULRICH HEREFORDS DISPERSAL SALE PT 2 FEBRUARY 21 | BALOG AUCTION LETHBRIDGE, ALBERTA S A L E 1:00pm MST JOIN US FOR LUNCH: 11:30 am

Welcome, to what would have been the 17th annual Ulrich Hereford's Bull & Female sale, but which has morphed into our Dispersal Sale Part 2! The first Dispersal Sale was held December 13, 2022 and ended up with much more finality than any of us expected. Dad passed away just 12 hours before the sale. As patriarch of both our family and the Ulrich Hereford legacy, he is deeply missed. His 92 years were filled with the love of family and his love of Hereford cattle and the Hereford family at large. He enjoyed his Herefords right to the end, and even in his final days in hospital would light up at the sight of a Hereford magazine.

And so we continue sharing our Ulrich Herefords with the world. While the December Sale dispersed the Spring cows and a mixed bunch of pairs, bred heifers, and a few bulls, this Sale Pt 2 provides a great assortment of the traditional Bull & Female Sale (coming 2 & long yearling bulls along with bred heifers) in addition to the Fall Cows and their calves at foot. Even a few open heifers are available to fit into your spring/summer breeding program right away. There should be something for everyone here!

We've had a Fall program for about the last 25+ years. To be honest, I just really enjoyed calving the cows out on Fall grass and, for the most part, not having to fuss with snowstorms and cold. These calves are older & tougher when those storms do come. The resulting bull calves are a nice long-yearling age when most folks are buying bulls and they have that age & growth advantage over the yearling youngsters in their first breeding year. The heifers can either stay in the Fall or easily be moved to the Spring to fit any program.

The calves may look a little scruffy with their long winter coats and grubby faces, but don't miss out - they are still packing their great genetics and will develop into the cows & bulls you want to grow your own program. They will still be nursing their dams on Sale Day, so they will be available as a package with the dam or can be weaned off into individual herds.

And so it is with very mixed feelings that we offer up these animals that we've poured our lives into over these last 50+ years. We truly strived to "specialize in light birthweights, with great performance, to produce remarkable cows". This included not being afraid to continue some of the old Hereford lines that helped make the breed what it is today.

Dad was always keen to participate in any performance testing that would ultimately improve the cattle. And to this day, the latest in performance testing available always included some Ulrich animals. We are extremely pleased with how well our Herefords have performed in Feed Efficiency testing! See more details on page 54.

It's been wonderful to be a part of the Hereford Fraternity across Canada and around the world. Thank you very much for your valued support over the years... With a little more time available, I certainly hope to continue enjoying the relationships built by Dad & myself with all of you!

We look forward to seeing many of you on Sale Day!

Sincerely,
Peter Ulrich

Welcome fellow Livestock Producers to the Chapter two Ulrich Complete Dispersal Sale!

The last chance to buy proven genetics from one of the most successful breeding programs on the continent!

We need to start by proudly updating producers of the tremendous success of sale number one.

Cattle sold to very successful breeders right across North America!

Sale number 2 will present a powerful selection of 30 plus first calf bred heifers, 35 plus coming 2 year olds and long yearling bulls, and 30 plus pairs that calved in September & October.

Something for everyone!

Top Genetics - Top Performance and once in a lifetime opportunity!

See you at the sale!

Respectfully,

R.C. (Bob) Balog

Instructions for Viewing And Bidding At the Sale

Visit www.dlms.ca, Fill out the registration form located under registration and sign-up for your free user account to select a username and password.

BIDDERS - To be approved as a bidder, Log in and click BUYER APPROVAL tab, select the sale you are interested in bidding at and click sign up.

For more information or for help getting approved Call:

Whitney Bosovich 780.991-3025 or Mark Shologan - 780-699-5082

TERMS & CONDITIONS

TERMS - The terms of the sale are cash or cheque payable at Lethbridge, AB, on Sale Day. The right of property shall not pass until settlement is made. All settlements must be made with the clerks of the sale before any cattle will be released. For US export, USDA and individual state rules will apply.

BIDS - Every animal entering the sale ring will be sold to the highest bidder. A floor price will apply to each animal consigned.

DISPUTES - In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK - Each animal becomes the risk of the purchaser as soon as sold.

ANNOUNCEMENTS - Errors discovered in the catalogue will be corrected by announcements from the Auction Stand at sale time and such corrections will take precedence over the printed matter in the catalogue.

CERTIFICATE OF REGISTRY - A certificate of registry duly transferred will be furnished to the buyer for each animal after settlement is made.

SHIPPING - Delivery is available at cost and at seller's convenience. Assistance for trucking arrangements will be given as economically as possible. Cattle are the buyer's risk immediately after sale. Any additional expenses are the responsibility of the buyer, including export expenses, duty, brokerage fees, etc.

BREEDER'S GUARANTEE - The consignors have done everything possible to assure you, the buyer, that every bull in this sale will be a breeder. A certified veterinarian has semen tested and physically evaluated every bull. However, should a problem arise, please inform the seller so further arrangements may be made.

ACCIDENTS - Although every precaution will be taken to protect the safety and comfort of buyers, neither the sales manager, auctioneer nor any owner assumes any responsibility in this matter and disclaims any liability, legal or otherwise, in the event of accident or loss of property.

LIABILITY - Balog Auction is acting as agent only and assumes no responsibility for representations made by the seller. Purchasers must look to the seller for fulfillment of all guarantees and representations made hereunder.

NO BULLS SELL AT CALGARY OR MEDICINE HAT
 All of our best are in this sale!

ALL BULLS OF BREEDING AGE ARE SEMEN TESTED BEFORE THE SALE

We strongly recommend that all animals be insured. Insurance agents will be available at the sale.

FLYING IN? If flying into Lethbridge Airport, call Balog Auction for pick up: 1(403)320-1980

Jim Hole was known as one of the all-time premier breeders in Canada, & once said that "43K" was the best bull he ever raised! Some had also claimed he was the best & most complete bull they had ever seen. 43K was smooth, thick, extremely heavy-boned with an outstanding yellow haircoat, & moved as freely as any bull could move. Daughters are feminine & growthy; sons keep on growing. These attributes are just as important today. It's bulls like 43K that have made the breed what it is today!

This light-coloured, good-haired bull with the Canadian pedigree was long & thick with sound feet. He pasture-bred until he was 12 years old! These were all good reasons for Misty Valley Farms to collect this bull. We bought some semen and were really pleased with the excellent females he left in our herd, improving udders superbly. His sons were easy to sell also.

22B has long been leaving well-put-together females with good hair and excellent udders. These females are infused with stayability and have been highly regarded by both commercial and purebred cattlemen alike! Not only have the females excelled like our special 511E, but 22B has injected our operation with fine sons such as 97J, an outstanding light birthweight sire and 53L who was Grand Champion at the Medicine Hat Bull Sale in 2003.

Wiley had excellent CE & light BW genetics! Offspring are vigorous at birth, thick, compact & well-marked with excellent pigment. A strong maternal factor is evidenced by his own fantastic feminine mother's (2R) super, flat, tight udder & small teats on each corner. Her consistent calves' avg'd 76 lb BW yet above avg WN.

Goggle-eyed, & red to the toes with pigmented feet, this was a stout son of 705! Extra thick in his butt and over the top, he was an impressive bull. He held his head up, bright & alert but was calm as a house kitten. Great doing ability was evident, and great carcass numbers concurred (3rd in Ribeye, and 128 index Marb)! The dam brought 21M light birthweight genetics and provided rich, rich milk from a great udder. 67X was also co-owned with Bert Anderson. 67X ranks top 4% in feed efficiency of all breeds in GrowSafe's database (over 270,000 head).

Rising Star 94Y was purchased as a 2-yr-old at Med Hat Bull Sale. He was a nice combination of sire 915W (who had consistently sired a good set of calves with muscle & thickness) & the dam, 107H (correct conformation, femininity, better udder & teats, richer milk). 94Y had the same great ability to sire a uniform, stout, & correct set of progeny! Any one of his solid powerful bulls was just like the other. Unfortunately, we lost 94Y that fall. This 118B cow in this sale is the last of his legacy.

60W fashioned this thick, solid-marked, deep bodied, heavy-set bull from a moderate-sized mother with strong fleshing ability! We never needed to wonder about the great performance from this guy – it was obvious! Plus he participated in CHA's feed efficiency trial and landed in the best bunch for gaining most on least feed. The cow was beautiful with mossy hair, and a flare for the important: a great udder, well-placed teats and powerful rich milk.

We acquired this semen through a Keith Gilmore Foundation fund-raiser. Mrnak Hereford Ranch of Bowman, North Dakota sold this 2015 High Selling Bull to Church Ranch here in Canada. 382 combines the maternal strength and carcass traits of his sire, 9126J, and the power, balance, style, and performance of the Dakota line while moderating birth weight and maintaining performance.

Westgards (Windimuir) raised this fine bull, and we were fortunate enough to acquire him through their dispersal sale. We were impressed with his Westgard progeny (calves showed excellent growth, thickness & volume), his attractive conformation and excellent feet and legs. He came from a great producing cow family. We were pleased to use his 67G son in our own herd to extend those attributes and genetics.

 PIERAN STERLING LASS 52K

When dropping off some sale animals at Piersons' a few years ago, we, of course, had to check out the herd bulls while there and I really liked this 27C bull. Terril wasn't willing to part with him yet, so it wasn't until last Fall that I was able to purchase him for my Fall program. It seems odd to have a dehorned bull around, but he's thick, broad, long & deep with nice quarters, good-footed with a solid Pieran pedigree (including a dab of Ulrich breeding back in 124J!) & a proven cowmaker. He's produced a good set of calves for us, so I used him again this past Fall.

CLARESHOLM VETERINARY SERVICES, LTD.

235 43 AVE EAST CLARESHOLM ALBERTA T0L 0T0

403-625-3677

January 19, 2023

Dear potential cattle buyers,

Claresholm Veterinary Services Ltd. has been providing veterinary services and consultation for over 40 years to the Ulrich Hereford Ranch. The majority of the service consists of breeding soundness evaluations of the bulls, pregnancy testing and herd health consultations. Health problems are minimized with a complete vaccination program for cows, calves, and bulls.

Calves are vaccinated with the Zoetis SelectVac Gold Plus vaccine program (the comprehensive program to protect against respiratory disease and BVD) in the spring at pasture turn out and at weaning in the fall.

The replacement heifers receive Bovi-Shield Gold FP5-VL5 in the spring before breeding. The cow herd receives Bovi-Shield Gold FP5-VL5 prior to calving. Cows and heifers also receive a scour prevention vaccine annually as well as a clostridial vaccine.

The bulls receive Bovi-Shield Gold FP5-VL5 in the spring as a yearling and are boosted with this again prior to the sale as a 2 year old.

The females in the sale were preg tested in mid October to be pregnant. Peter has a copy of their suspected calving dates from the preg test. Their calving dates range from April 8th-June 15th.

Claresholm Veterinary Services Ltd. is proud to be associated with the Ulrich Hereford Ranch and their cattle operation!

Sincerely,

Dr. Kelsey Vandervalk

ALL STAR BREEDER

We at Ulrich Hereford Ranch are pleased to have been awarded the status of 5-Star Breeder. This simply means that we have completely & accurately reported 5 traits: Calving Ease, Birthweights, Weaning Weights, Yearling Weights, Udder & Teat scores on our entire calf crop.

FEED EFFICIENCY

RFI - WHAT IS IT AND WHY SHOULD I CARE?

Residual Feed Intake is a measure of feed efficiency. One point in the scale represents 10 pounds of feed per year. A larger number on the scale indicates the animal is more efficient. It is important to balance this trait with gain, so the PWG EPD (Post Weaning Gain) identifies the difference between the WW & YW EPDs to keep growth in the analysis. Research has shown that identifying efficient animals translates into a huge savings for the cow/calf industry.

Ulrich Herefords' Feed Efficiency!

In the first two years of CHA Residual Feed Intake (RFI) testing, over 600 purebred Hereford bulls were monitored, with an Ulrich bull capturing the **top overall ranking!** (The majority of the Ulrich's other entries also ranked in the top half of those results.)

Ulrich Herefords produced **5 sires** in the **top 1%** of the whole GrowSafe (Vytelle) database, and **13 sires** in the **top 10%** (well over **270,000** animals worldwide).

WHAT IS AN EPD?

Expected Progeny Differences (EPDs) are genetic predictions producers can use when making selection decisions. These values are available on performance animals from breed associations. It is important to understand you cannot compare EPDs between breeds, only within a breed. A buyer is always advised to use more than just the EPDs regardless of accuracy when making purchase decisions.

An Expected Progeny Difference (EPD) is a measure of the genetic merit of an animal using relevant performance and pedigree information. EPDs are expressed in the units of measure. For example, birth weight is expressed in pounds, and rib-eye area is expressed in square inches.

EPDs come from performance data. Producers submit data on their cattle. From this data, researchers look at the differences between animals raised in the same environment (contemporary groups) and ascertain the portion of that difference that is due to genetics (heritability). Also included in this is how the different traits relate to each other and interact together (correlations). They can then directly compare genetic differences among animals using the pedigree information contained in the CHA and AHA registries. The result is a value that can be directly compared between animals and across environments, an EPD.

EPD'S USED IN THIS CATALOGUE

Calving Ease EPD (CE) - calculated using birth weight and calving ease score information. Calving ease EPDs represent the ease with which progeny of an animal are born to first calf heifers. The EPD is expressed as a percent probability, with a higher value representing calves with a higher probability of being born unassisted.

Birth Weight EPD (BW) - is an indicator of calving ease. Higher birth weight EPDs usually indicates more calving difficulty.

Weaning Weight EPD (WW) - reflects progeny growth differences up to 205-days.

Yearling Weight EPD (YW) - reflects progeny growth differences through to 365-days.

Milk EPD (Milk) - indicates the ability of a sire's daughters to provide their calves with an environment that encourages growth from birth to weaning, through mothering ability and milk production. This EPD is expressed in the expected difference in pounds of calf at weaning.

Total Maternal EPD (TM) - also known as Milk + Growth, this EPD combines the milk EPD plus 1/2 the Weaning Weight EPD. It is expressed in pounds of calf weaned at 205-Days and combines the genetics for pre-weaning growth and the influence of the maternal environment on the weaning weight of the daughter's progeny.

Maternal Calving Ease EPD (MCE) - represents the ease with which a sire's daughters will calve as first calf heifers, when compared to daughters of other sires. The EPD is expressed as a percent probability, with a higher value representing daughters with a higher probability of unassisted calving.

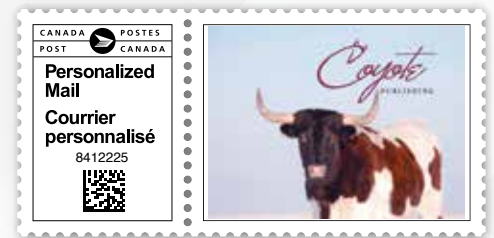

COMPARABILITY OF EPD'S

EPDs from Hereford animals are directly comparable to other Herefords in North America, due to the inclusion of data from Canada and the United States. As well, it is important to remember that Hereford EPDs are NOT directly comparable to EPDs produced by different breeds, such as Angus or Simmental.

All EPD's were quoted at time of writing, and weekly runs may have altered these numbers over time.
